EDUCATION

Hunter College, City University of New York (CUNY)

Expected May 2027

Bachelor of Arts in Computer Science, Minor in Mathematics | GPA: 3.63/4.00

New York, NY

Relevant Coursework: Software Analysis & Design, Computer Architecture, Operating Systems, Data Communications & Networks, Artificial Intelligence, Calculus, Discrete Mathematics

Honors & Awards: Dean's List (Fall 2024 - Fall 2025), Peter F. Vallone Academic Scholarship

SKILLS

Programming: C++, Python, C, Bash, Node.js, TypeScript, JavaScript, HTML, CSS, Markdown

Technologies: Git, GitHub, PostgreSQL, Linux, Unix, Make, GCC, KVM, Wireshark

Libraries/Frameworks: Next.js, React, Supabase, Clerk, TailwindCSS, OpenCV, Jekyll, Pygame, Pyinstaller

Certifications: Codepath Intermediate Cybersecurity (Apr 2024), Codepath Advanced Technical Interview Prep (Aug 2024)

EXPERIENCE

CUNY Tech Prep

Aug 2025 - Present

Fellow, Web Development

New York, NY

- Selected for a competitive web development fellowship with students from across the 11 CUNY senior colleges, where Fellows create technical projects using tools such as React, Node + Express, and PostgreSQL.
- Learned industry best practices for design, implementation, and deployment, such as MVC, version control with Git/GitHub, agile & Scrum with Trello and Slack, test-driven development, and CI/CD.

Jupiter Leo Productions

Jul 2025 – Aug 2025

Software Development Intern

Remote

- Collaborated with a team of 3 to develop interactive educational games using HTML, CSS, and JavaScript, resulting in a 34% improvement in course engagement and learning outcomes.
- Updated a financial education platform by adding multimedia content, such as images and interactive elements, to enhance visual engagement and user experience for 100+ users.
- Streamlined content creation workflows by integrating generative AI tools, reducing manual design efforts by 50%, and accelerating production time by 20%.
- Improved skills in responsive design, accessibility, and collaborative development through designer & educator feedback.

PROJECTS

HerRide | Next.js, Node.js, Supabase, Clerk, TypeScript, TailwindCSS

[View Source](#)

- Developed a full-stack, women-only ridesharing platform using Next.js in a team of 4 as part of CUNY Tech Prep.
- Integrated secure user authentication and management using Clerk and designed PostgreSQL schemas with role-based access using Supabase.
- Contributed to product design and planning by prototyping in Figma and coordinating features, requirements, and tech stack decisions using Trello and Notion.

Check My Fit, CTP Hacks 2025 | Node.js, Express, EJS, HTML, CSS

[View Site](#)

- Participated in CTP Hacks 2025 with a team of 4, building a full-stack MVP in under 48 hours, while competing among 20+ teams.
- Implemented a web application, creating an outfit tracker to help people manage their personal wardrobe.
- Built the user interface using Express and EJS templating, integrating it with a MySQL database to support dynamic outfit tracking and scheduling.

PVD Image Steganography | C++, OpenCV

[View Source](#)

- Created an image steganography program in C++ that encodes and decodes text within an image by manipulating differences in pixel RGB values, while keeping image quality intact.
- Used the OpenCV library for image processing and support for various image formats.
- Implemented custom classes and data structures, including queues, to improve programming encapsulation and efficiency.

PySweeper | Python, Pygame, PyInstaller, Github Actions

[View Source](#)

- Developed a Minesweeper game in Python using the Pygame library, by creating an user interface and handling input events.
- Utilized PyInstaller and GitHub Actions to automate building executables for Windows, Linux, and macOS systems.
