Education

Hunter College, City University of New York (CUNY) Expected May 2027
Bachelor of Arts in Computer Science, Minor in Mathematics | GPA: 3.61/4.00 *New York, NY*

- Relevant Coursework: Software Analysis & Design, Computer Architecture, Operating Systems, Data Communications & Networks, Artificial Intelligence, Database Management, Calculus, Discrete Mathematics, Capstone
- Honors & Awards: Dean's List (Fall 2024 - Fall 2025), Peter F. Vallone Academic Scholarship

Skills

- **Programming:** C++, Python, C, Bash, Node.js, Dart, TypeScript, JavaScript, HTML, CSS, Markdown
- **Technologies:** Git, GitHub, Linux, Unix, Docker, PostgreSQL, Make, GCC, KVM, Wireshark
- **Libraries/Frameworks:** Next.js, React, Flutter, Supabase, Firebase, TailwindCSS, OpenCV, Jekyll, Pygame, Pyinstaller
- **Certifications:** Codepath Intermediate Cybersecurity (Apr 2024), Codepath Advanced Technical Interview Prep (Aug 2024)

Experience

CUNY Tech Prep Aug 2025 — May 2026
Fellow, Web Development *New York, NY*

- Selected for a competitive web development fellowship with students from across the 11 CUNY senior colleges, where Fellows create technical projects using tools such as React, Node + Express, and PostgreSQL.
- Learned industry best practices for design, implementation, and deployment, such as MVC, version control with Git/GitHub, agile & Scrum with Trello and Slack, test-driven development, and CI/CD.

Jupiter Leo Productions Jul 2025 — Aug 2025
Software Development Intern *Remote*

- Collaborated with a team of 3 to develop interactive educational games using HTML, CSS, and JavaScript, resulting in a 34% improvement in course engagement and learning outcomes.
- Updated a financial education platform by adding multimedia content, such as images and interactive elements, to enhance visual engagement and user experience for 100+ users.
- Streamlined content creation workflows by integrating generative AI tools, reducing manual design efforts by 50%, and accelerating production time by 20%.
- Improved skills in responsive design, accessibility, and collaborative development through designer & educator feedback.

Projects

Flocksync | *Flutter, Firebase, Firestore, Dart, Node.js, OpenStreetMap* *View Source*

- Built a cross-platform rental management application in Flutter to help tenants and property managers centralize communication, maintenance, and property-related workflows.
- Implemented Firebase Authentication and Firestore data models for secure account creation, tenant onboarding, role-based access control, and real-time app updates.
- Integrated OpenStreetMap APIs for address autocomplete and verification through a Node.js backend, significantly improving property lookup and input accuracy.

HerRide | *Next.js, Node.js, Supabase, Clerk, TypeScript, TailwindCSS* *View Source*

- Developed a full-stack, women-only ridesharing platform using Next.js in a team of 4 as part of CUNY Tech Prep.
- Integrated secure user authentication and management using Clerk and designed PostgreSQL schemas with role-based access using Supabase.
- Contributed to product design and planning by prototyping in Figma and coordinating features, requirements, and tech stack decisions using Trello and Notion.

Check My Fit, CTP Hacks 2025 | *Node.js, Express, EJS, HTML, CSS* *View Site*

- Participated in CTP Hacks 2025 with a team of 4, building a full-stack MVP in under 48 hours, while competing among 20+ teams.
- Implemented a web application, creating an outfit tracker to help people manage their personal wardrobe.
- Built the user interface using Express and EJS templating, integrating it with a MySQL database to support dynamic outfit tracking and scheduling.

PVD Image Steganography | *C++, OpenCV* *View Source*

- Created an image steganography program in C++ that encodes and decodes text within an image by manipulating differences in pixel RGB values, while keeping image quality intact.
- Used the OpenCV library for image processing and support for various image formats.
- Implemented custom classes and data structures, including queues, to improve programming encapsulation and efficiency.
